EDUCATION

B.E of Computer Science Engineering, 2021 – 2025 | CGPA: 8.11/10

Bangalore Technological Institute., Visvesvaraya Technological University (VTU).

SKILLS

Technical skills : C ,C++, Java(basics), Python,SQL

Frameworks: Pandas, NumPy, Matplotlib,Django,

Frontend: HTML, CSS, Bootstrap, Javascript, Reacts.js

Backend: Flask,, Node.js,Rest API's.

Cloud Skills: AWS (EC2, S3,RDS, EFS, VPC), LAMP Stack Deployment, Cloud Networking, IAM, Shell Scripting, Linux Commands, Apache, MariaDB, VMware, Windows Server (Active Directory, DNS, DHCP),CI/CD(IAC), Kubernetes ,GCD.

Tools: Git,Github, Jupyter Notebook, VS Code, Power BI, .

Operating Systems: Linux, Windows.

Communication Languages

English, Telugu ,Hindi, Kannada

Internship Experience

Role Name: Full stack Development

Oct 2023– Nov 2023.

Company Name: Tekky Bench

Bengaluru, Karnataka.

Completed a full stack web development internship where I contributed to an e-commerce platform that achieved 35% user growth by building a responsive UI with React.js, optimizing backend APIs with Node.js, and implementing Redis caching for performance improvement. Led front-end styling with Bootstrap and CSS, resulting in a 50% design enhancement. Additionally, developed and deployed a blogging platform using Django and WordPress, integrated with React via REST API, and hosted on AWS to ensure seamless performance under high traffic. Received certification for successful completion of the internship.

Role Name: Data Analysis Using Python Trainee

Dec 2024 – Feb 2025.

Company Name: Anudip Foundation for Social Welfare

Bengaluru, Karnataka.

Completed a hands-on training program focused on data analysis using Python. Gained practical experience in data cleaning, manipulation, and visualization with libraries like Pandas, NumPy, Matplotlib, and Seaborn. Worked in Jupyter Notebook and Google Colab environments to analyze datasets and extract actionable insights. Strengthened analytical thinking, teamwork, and communication skills while solving real-world data problems.

Role Name: Cloud Application Developer Intern

Feb 2025 – May 2025.

Company Name: Rooman Technologies

Bengaluru, Karnataka.

Completed a cloud computing internship focused on deploying web applications using AWS. Worked with services like EC2, S3, EFS, and VPC to build scalable infrastructure, and configured LAMP stack environments for web hosting. Gained experience in Windows Server management via VMware, including Active Directory, DNS, and DHCP. Automated routine tasks using shell scripting and managed servers through PuTTY and Linux CLI, enhancing cloud and networking skills.

PROJECTS

- Internship Project - Event Management System(Full stack web development):**

Led the development of a full-stack event management system with user roles, real-time notifications, and secure authentication. This project leveraged React.js for the frontend, Node.js and Express.js for the backend, and MongoDB for

data storage, showcasing strong full-stack development capabilities.

- **Online Resume Builder (Mini Project):**

Led the development of an online resume builder platform where users could input details to generate formatted PDF resumes. This project coordinated frontend and backend tasks, utilizing Node.js for server-side logic and MongoDB for data storage.

- **Smart Home Security System Using IOT (Major project):**

Designed and implemented a cost-effective IoT-based home security system using Raspberry Pi and multiple sensors (gas, fire, IR, magnetic, DHT11) to detect threats and trigger real-time alerts via GSM and buzzer. Enabled real-time data display on an LCD, enhancing safety through comprehensive environmental monitoring.

- **Internship Project - Cafe Web Application Deployment on AWS**

Deployed a PHP-based Cafe web application on an AWS EC2 instance using the LAMP stack, configured a secure VPC with proper networking, and integrated AWS storage services (S3, EFS). Set up MariaDB database and launched the application live with necessary security and permissions.
